

BA (Hons): Business Management The 1-1-1 Study Model

Gain a UK degree starting in China

Business affects nearly every part of life and all business organisations demand well qualified, versatile and adaptable staff. To progress in business, graduates need high level skills and knowledge, plus sound business acumen. The rewards can be high and the opportunities dynamic.

Basingstoke College of Technology is looking for partner colleges in China to jointly deliver this three year degree programme. Year one will be delivered in China, followed by year two at Basingstoke College, at which point the student will obtain a Higher National Diploma qualification. The final year is studied at Southampton Solent University where the full degree is obtained. This degree is exactly the same as one gained by studying all three years at university. Students will have to apply to join the second year programme and must have passed year one and have an IELTS score of 6.0 to be eligible. Progression to the third year at Southampton Solent is guaranteed, providing the student has achieved sufficiently well at the HND.

We will offer students a vocational and academic insight into the business world that not only develops their understanding, but also boosts their employability prospects

Fees for the three year course will be:

Year one in China – to be agreed with the local college - a profit share arrangement will be agreed.

Year two at BCoT - £6200.

Year three at Solent University currently costs between £10-11000 per year.
